Education

Sri Shakthi Institute of Engineering and Technology

2023 – Present

B.Tech in Artificial Intelligence & Machine Learning - CGPA: 8.38%

Universal Matric Higher Secondary School

2021 – 2023

Higher Secondary (HSC) – Score: 87.3%

Technologies

AI & ML: Python, Scikit-learn, PyTorch, OpenCV LangChain, LangGrah, NumPy, Pandas, LLMs, MLflow, Airflow

Development: FastAPI, Django, React, Docker, GitHub, Linux

Databases: MySQL, MongoDB, Redis, SQLite

Experience

LLM Post-Training Intern, Ethara AI

Feb 2026 – Apr 2026

- Processed and annotated multimodal datasets (image, video) for Supervised Fine-Tuning and Reinforcement Learning from Human Feedback. Evaluated AI responses using defined guidelines to support model quality, accuracy, and alignment.

AI & ML Intern, Elevate Labs

May 2025 – Jun 2025

- Conducted data preprocessing, feature engineering, and trained machine learning models using Python and Scikit-learn. Built and optimized a CNN-based face mask detection model in TensorFlow, achieving **88.35%** accuracy.

Projects

AI Startup Validator Agent – Multi-Agent Startup Validation System

[Link](#)

- Developed an autonomous multi-agent platform that transforms startup ideas into actionable technical and business execution plans. Agent-to-agent reasoning workflows with structured outputs, report generation, and iterative validation. Orchestrated specialized AI agents for feasibility assessment, market analysis, hiring strategy, growth planning, and MVP definition. **Tech Stack:** Python, LangGraph, LangChain, FastAPI, Ollama, React, Docker

FarmAssist – AI Agricultural Assistant

[Link](#)

- Developed an AI-powered agricultural assistant integrating LLMs, RAG, computer vision, voice interaction, and real-time weather services to support crop management, pest control, and disease diagnosis. Enabling farmers to access actionable insights through both text and voice interfaces. **Tech Stack:** Python, FastAPI, Gemini, CLIP, ViT-GPT2, ChromaDB, React Native, JWT Authentication

Customer Churn Prediction – ML Pipeline

[Link](#)

- Built an end-to-end automated ML pipeline for telecom churn prediction using Airflow for workflow orchestration and MLflow for experiment tracking, training multiple Scikit-learn models with hyperparameter tuning, promoting the best-performing model via MLflow model aliases for production, and serving it through a Dockerized FastAPI application. **Tech Stack:** Python, Scikit-learn, MLflow, Airflow, FastAPI, Docker

Facial Recognition Based Attendance System

[Link](#)

- Developed a smart attendance management system using facial recognition to automate attendance tracking through face detection and verification. Implemented role based access control for students, faculty, and administrators to securely manage attendance records and user operations. **Tech Stack:** Python, Django, FastAPI, OpenCV, PyTorch, TensorFlow, Qdrant

Achievements

- Led the development of a smart attendance system deployed across the college and used by 1,500+ students and faculty.
- Finalist in **Horizon'25**, a national-level 24-hour hackathon at KPR College.

Certifications

- Completed **Intel Industrial Training** (October to December 2025) - View Certificate
- **Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate** - View Certificate
- Completed **TCS iON Career Edge – Young Professional** course - View Certificate
